- Represents MavunoSasa publicly
- Oversees impact and growth strategy

Name: Regina Mlay

Tittle: Chief Technology Officer (CTO) & Co-Founder

Role focus: Platform architecture, scalability, security
Why this title works:

- Signals technical depth and long-term product ownership

Typical responsibilities:

- Leads backend, integrations (USSD, SMS, WhatsApp)
- Oversees system architecture and data security
- Guides the engineering roadmap and scalability

Name: Emanuel Silayo
Tittle: Head of Data & AI (Lead Machine Learning Engineer)

Role focus: AI/ML models, analytics, predictions
Why this title works:

- Directly aligns with the **AI Innovator's Challenge**
- Shows responsible AI ownership

Typical responsibilities:

- Builds risk-scoring and prediction models
- Designs data pipelines and monitoring
- Ensures AI is playbook-bounded and explainable
- Measures model performance and impact

Name: Simon Flavian

Tittle: Head of Product & User Experience

Role focus: Product design, farmer usability, workflows
Why this title works:

- Shows farmer-centered design and execution discipline

Typical responsibilities:

- Defines product requirements and roadmaps
- Designs farmer, agent, and dashboard experiences
- Ensures USSD/SMS flows are simple and usable
- Coordinates feedback loops with field teams

Name: Angel Msechu

Tittle: Head of Field Operations & Partnerships

Role focus: Deployment, farmer onboarding, local partners
Why this title works:

- Extremely important for Tanzania context
- Signals you are not “tech-only.”

Typical responsibilities:

- Manages agent network and onboarding
- Coordinates extension officers and farmer groups
- Oversees training and pilot roll-outs
- Ensures data quality from the field

Name: Christina Mlay
Tittle: Agronomy & Extension Lead

Role focus: Crop expertise, playbooks, advisory quality
Why this title works:

- Builds trust with farmers, government, and donors
- Balances AI with real agronomic knowledge

Typical responsibilities:

- Develops and validates crop-stage playbooks
- Works with extension officers and researchers
- Ensures recommendations are locally relevant
- Supports evaluation of farming outcomes
